

...IN THE HOME

Year after year, billions of dollars worth of oil, natural gas and electricity are wasted in residential and commercial buildings due to the inefficient operation of heating, central air conditioning and refrigeration systems.

...IN THE WORKPLACE

Intellidyne and the future.

Since being established in 1996, Intellidyne has introduced commercial and residential products that have been installed in hotels, restaurants, office buildings, hospitals, schools, manufacturing facilities, government buildings, residences and places of worship throughout the world. Intellidyne is becoming recognized as the leading global manufacturer of energy-saving products and technologies designed specifically to reduce energy consumption and costs. Intellidyne products have been verified again and again. As the benefits of this technology become better known, we will fulfill our mission of having an immense beneficial worldwide impact on the earth's fragile environment.

Whether you're a dealer, distributor or homeowner, if you are interested in Intellidyne's leading-edge, energy-saving products for heating, air conditioning and commercial refrigeration systems, call 1-866-216-0777 toll-free for more information. Or email us at sales@intellidynellc.com. And put Intellidyne energy-saving technology to work for you.

INNOVATIVE
ENERGY MANAGEMENT
SOLUTIONS.

GUARANTEED SAVINGS.

INTELLIDYNE PRODUCTS

COMMERCIAL

RESIDENTIAL

IntelliCon®-CHS
Commercial Steam Heating System Fuel Economizer for systems rated above 2.5 million BTU.

IntelliCon®-LCS
Light Commercial Steam Heating System Fuel Economizer for systems rated 300,000 to 2.5 million BTU.

IntelliCon®-CAC
Commercial Air Conditioning Electrical Consumption Economizer for systems rated greater than 5-Ton.

IntelliCon®-HW+
Hot Water Heating System Fuel Economizer for systems rated up to 300,000 BTU.

IntelliCon®-LCH
Light Commercial Hot Water Heating System Fuel Economizer for systems rated 300,000 to 2.5 million BTU.

IntelliCon®-RU
Refrigeration Unit Electrical Consumption Economizer for systems rated 1-HP or larger.

IntelliCon®-AC
Central Air Conditioning Electrical Consumption Economizer for systems rated up to 5-Ton.

IntelliCon®-CHW
Commercial Hot Water Heating System Fuel Economizer for systems rated above 2.5 million BTU.

IntelliCon®-FA
Forced Air Heating System Fuel Economizer for commercial and residential systems rated up to 300,000 BTU.

Circled economizers now display real-time energy savings!

Practical, cost effective, energy-saving technologies.

Intellidyne has developed and manufactures our own line of proprietary, microprocessor-based, energy-saving products, which are different and more effective than any other technology on the market today. Intellidyne products reduce the amount of energy required to run boilers, forced air heating and compressor-driven air conditioner and refrigeration systems. These cost-effective, practical technologies, which are easily installed in existing systems or specified for new construction, are recognized around the world and will reduce energy costs and man's impact on the environment and natural resources.

Through every step of our manufacturing process, strict quality controls are maintained. Intellidyne products are UL-listed as energy management equipment, and independent testing facilities, such as Brookhaven National Laboratories, ETL/Inchscape and major utility companies, have validated the performance of our products. In fact, R.W. Beckett, one of the most respected names in oil-fired heating systems, offers Intellidyne residential energy-saving technology under the Beckett HeatManager brand.

Building a better mousetrap.

The fundamental technology behind every *IntelliCon* product is brilliant in its simplicity. The basic premise behind our patented technology is to save energy by optimizing system performance through real-time "load" analysis and control. These dynamic, microprocessor-based products reduce energy consumption by a minimum of 10%, with typical savings of 15% - 20%. Designed for HVAC and refrigeration systems, *IntelliCon* products do not require any programming or maintenance, are easy to install, work in conjunction with existing controls, do not void any manufacturers warranties and have a 15-year warranty against manufacturing defects.
